Finally, the options for importing and exporting data into and out of Salesforce, including the capabilities of external data sources are particularly covered by this section. Our salesforce developer certification course is the best way to get into this aspiring field and pave your way as a successful Salesforce developer. This is an area that must be focused on to do well in the exam.Business Logic and Process AutomationData Modeling and Management Salesforce Platform App BuilderCertification ContentsThe following are the core topic areas of the Salesforce Platform App Builder certification and what test takers are expected to know: Salesforce FundamentalsIn this section, test takers need to be familiar with the capabilities of the base objects and know the capabilities and use cases for declarative customizations versus programmatic solutions. Copyright 2019 - A www.FocusOnForce.com Copyright 2019 - A www.FocusOnForce.com In addition, the knowledge on Lightning Components and how they can be incorporated into an application declaratively or programmatically are the main focus of this topic. Data Modeling & ManagementThe Data Modeling and Management topic has the third-largest weighting in the exam, so test takers should spend time to be familiar with topic objectives. Find out if you are ready for the exam. To prepare successfully for the certification exam, we recommend to work through ourPlatform App Builder Study Guide and Platform App Builder Practice ExamsPlatform App BuilderStudy GuideEvery topic objective explained thoroughly. The topic with the highest weighting is Business Logic and Process Automation as it is weighted at 28%. Once a practitioner achieves this certification, he or she will be a Certified Platform App Builder. In addition, the

considerations for changing a field data type is also relevant.
